

Baseline Tests Info

Due to the fact that the results from Baseline tests are valid for 2 years, we are still requiring players to complete Baseline tests as per normal season startup procedures for SMHA.

If your player fits any of the following criteria, you will receive an email from ImPACT Baseline tests as our upcoming season approaches;

- new to the U13 (Pee Wee) age level
- new to SMHA U13 (Pee Wee) and up
- completed the Baseline test prior to the 2019 season

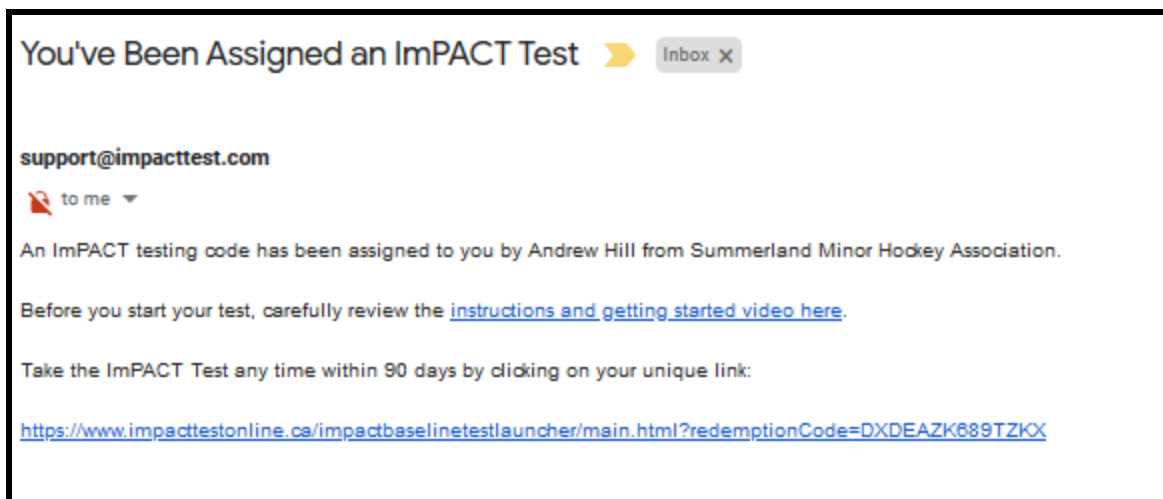

This email will contain a link to do the Baseline test at home and is unique to each player. **If you have multiple players per household**, you will get multiple links/emails – these links are not player specific, but the info you enter, i.e. player name, will differentiate each test.

This email might end up in your Junk Mail folder. Once the links have been mailed out, a reminder email will be sent from SMHA.

Once in your inbox/junk mail, this email will look like this (sender name is 'support'):

The actual email will include some links, the second link being for the test:

It is recommended that your player takes the baseline test on a desktop computer or a laptop with a mouse attached – do not do the test on a tablet or phone. It is also recommended that you use **Google Chrome** as your web browser, and allow for “pop-ups” to occur.

If you need assistance in this, please let Andrew Hill know (hillaj17@gmail.com) and arrangements possibly can be made.

For those new to this process, a “helper” email will be sent via email as well.

Our goal is for the baselines to be taken at home, if this cannot be undertaken, case-by-case solutions will be found to assist the best we can.

The SMHA webpage has links explaining the ImpACT baseline test, as well as documents to help with anyone new to this process. This can be found at <https://www.summerlandminorhockey.org/baseline-test-concussion-info/>.

Again, please pass on any questions or concerns to Andrew Hill.
